

Addendum to Operating Agreement for Peach LFTY0407 DAO LLC:

1. Tokens will automatically be clawed back on September 6th, 2030. Owners will receive funds at \$56/token (2% annual appreciation). There are no fees when tokens are automatically bought back. The seller has the option to buy back the equity at any time before the 6 year period is up, but it must be at the set price of \$56/token (12% appreciation).
2. Clawback is enabled.
3. The seller will put up 60% of their ownership in the property as collateral. If the seller defaults on their current loan, the loan will be transferred to the DAO LLC, and the other investors can vote, via a Supermajority of 60%+, to claw back the remaining 60% of the seller's ownership.
4. If the seller does not buy back tokens within 90 days of the buy-back date, the other investors can vote, via a Supermajority of 60%+, to claw back the remaining 60% of the seller's ownership.
